

This work, performed with data science contractor [Future Energy Associates](#), proposes a v1 of the **EnergyTag GC Registry API Specification**. The aim of the project was to facilitate the implementation of Granular Certificate registries with robust technical harmonisation.

To view all relevant documentation, please follow the links below:

1. [GC Registry White Paper](#)
2. [Systems Architecture](#)
3. [API Specification](#)

Please do keep in mind that this is the first version of the publications. A v2 of this work will be published in the future based on feedback.

Should you have any comments or suggestions regarding the above documents, please contact: connor@futureenergy.associates, killian@energytag.org.
